- ✚ Specialty and focus in aesthetic eyelid surgery, including more than 2000 cases of double eyelid surgery, upper eyelid lift and eye bags removal.
- ✚ Special interests in facial rejuvenation and contouring with autologous fat graft injection (lipo-filling) and lipo-sculpture

**Dr. Darren Khoo Teng Lye** is a **certified consultant plastic, reconstructive and aesthetic surgeon**. He has been well-trained in plastic surgery in several centres in Malaysia since 2004, including Hospital Universiti Sains Malaysia and Hospital Kuala Lumpur under the training program of Master of Surgery (Plastic Surgery). This structured training provided him the opportunity to work with the finest plastic and reconstructive surgeons in Malaysia to acquire the invaluable surgical skills and experiences to deal with various challenging conditions. Upon completing this training program, he was conferred as the Gold Medalist for being the Best Overall Postgraduate Student of the Master of Medicine Program.

For continuous professional development in aesthetic surgery, he underwent further specialization abroad, especially in Taiwan and Korea, which are countries well-known for their plastic and aesthetic surgery. He was a visiting fellow of craniofacial surgery in the world-renowned Chang Gung Craniofacial Centre of Chang Gung Memorial Hospital, Taiwan in 2011. He had gained invaluable knowledge and skills at the Korea International Aesthetic Surgery Union of Seoul and V Plastic Surgery Centre of Daegu City South Korea. His oculoplastic and aesthetic surgery subspecialty fellowship training was in Daegu Catholic University Medical Centre in Daegu of South Korea, under Professor Dr David Dae-Hwan Park, and EFIL Plastic Surgery Centre with Dr Peter Kim who is well-known in rhinoplasty and facial contouring surgery. In addition, he holds a Diploma in Aesthetic Medicine (USA) granted by American Academy of Aesthetic Medicine.

He believes in an enhanced physical appearance as a mean to boost both physical and psychological well-beings in his patients/clients. He has extensive experience in various minimally invasive facial aesthetic procedures, including

- Facial V-Line shaping procedures like thread lift and face lipo-sculpture

- Laser facial resurfacing and rejuvenation, like for acne scarring, large open pores, facial pigmentation disorders and wrinkles
- Facial injectable like facial filler augmentation and botulinum toxin A injections

He has particular interest and expertise in

- Eyelid surgery (blepharoplasty) like
  - double eyelid creation (suture or incisional methods)
  - inner eye corner enlargement surgery,
  - upper eyelid lift,
  - sub-brow eyelid lift,
  - eye bags removal without scars and tear trough smoothing,
  - droopy eyelid (ptosis) correction
- Nose shaping surgery (Rhinoplasty)
- Fat graft transfer for facial rejuvenation and contouring
- Body contouring and slimming surgeries (liposculpture and abdominoplasty).
- Scar treatment (keloids and hypertrophic scars)

For reconstructive surgery, he is offering expert management for cleft lip and palate, facial injury (wounds and fractures), benign and malignant skin tumours, skin vascular anomalies, burn injury, breast reconstruction for breast cancer patients. These clinical experiences have been reported in many international journal publications. He had been awarded the Young Investigator Award (Zimmer Award) of 5th World Congress on Tissue Banking and the Tun Abdul Razak Research Award 2008. To extend his clinical service for the less fortunate ones, he has served as a visiting plastic surgeon and humanitarian volunteer for MERCY Malaysia for The Cleft Lip and Palate Project in Bangladesh.
