Shah Jumaat Mohd. Yussof
President, MSPRS
6th January 2023

Dear Colleagues and Friends of Plastic Surgery,

I would like to welcome everyone to our Society's first event of the year, The Cosmetic Breast Surgery: Symposium and Live Surgery 2023 being jointly organized by DoctorOnCall Pro. We will be conducting this Symposium on the 25th and 26th of February 2023 in Kuala Lumpur, Malaysia.

Our organising committee has brought together prominent Plastic Surgeons in this field to share with us their knowledge and experience in dealing with Aesthetic Breast Surgery. The event will also include live surgery sessions that will be conducted at Beverly Wilshire Medical Centre, Kuala Lumpur.

As our fraternity gets bigger and stronger, events like this are a must to not only keep us abreast with the latest development in our field, but also to foster a close bond between us. This symposium will be opened to our Plastic Surgical Residents and I hope that they will take the opportunity to not only learn from the best but build professional relationships with senior members of the fraternity and industry.

I would like to take this opportunity to thank the Organising Chairperson, Dr. Wan Syazli and his team for a job well done and my gratitude to all the sponsors and partners of this event.

I am sure that we would all benefit greatly from the symposium and I hope that it's not too late to wish everyone a Happy New Year 2023.

Take care all and looking forward to catching up in February...

Key Note Address

dr Wan Syazli Rodzaian Bin Wan Ahmad Kamal
Chairman of the Organizing Committee
Treasurer, MSPRS
Plastic Surgeon
Avisena Women & Children Specialist Hospital

As Plastic Surgeons, we strive to provide our patients with the best cosmetic and functional outcomes by combining art and science. Only with precision and creativity, we could promise an outstanding outcome in cosmetic breast surgery.

Therefore, we have arranged a variety of topics to cover the art and sciences of cosmetic breast surgery from silicone breast implant augmentation to fat grafting and breast reduction. In addition, we also have a session on breast reconstruction for non-cosmetic cases as well as a panel discussion on complex cases.

My utmost gratitude to the distinguished speakers for their willingness to share their expertise with us and to everyone for making this event a success. Thank you.
